<u>Page 1.</u>

The end of the year is rapidly coming. Tidelands is gearing up for 2011. It really seems like 2010 just started a few days ago! We have had several great events and outings this year. In my opinion the JOTA event in October was one of the best this year for the club. There were several club members present & a bunch of scouts were there, and I think all of them had a turn on the HF radio. I think they enjoyed it.

Speaking of events we still have a couple left for 2010. The Skywarn recognition day will be on December 04, and will be at the north county building on FM 646. We usually get started after breakfast.

The Tidelands Christmas party will be on December 17, and will be at Ryan's in Texas City at 7:00 PM.

An email reminder will be sent before each event as always.

To start off 2011 Tidelands will be participating in the SPAR winter field day. This will be held the last weekend in January. We have been involved in SPAR WFD for the past three years. We did very well last year with over 3,000 points! I hope we can get some more operators out this year even if it's just for 30-45 minutes. The club can always use the extra points & multipliers.

I would like to see the members come up with some ideas for outings/events at the club meetings, or some ideas for programs at the club meetings. It may be something you saw or read about relating to amateur radio or something else. Don't be afraid to offer up your opinions, we welcome them.

<u>Page 2.</u>

We will have a guest speaker at the meeting on November 11. The speaker will be from the Texas City Police Dept. Sergeant Jess Colwell is the new director of The Citizens Police Academy, and has some information that he would like to pass to the Tidelands group about the program.

We will also be holding nominations for the 2011 club officers. I hope all TARS members can be present for this meeting.

Bill Steele,WA5WVP gave me a box the other day that contains some of the club history from years past. I have been looking over the contents, and have found several old issues of Hamtides, the oldest dating from 1974. There are also some old meeting minutes, club rosters, old hamfest flyers & etc..

I will be taking some of the articles from the old hamtides & adding them to the new issues from time to time. Some of you may even remember some of them from the time they were written.

One of the old meeting minutes they were talking about the new VEC's taking over the testing from the FCC, and having hams become VE's to administer the amateur exams. This was a very new thing then, but is old hat now. Just like when we were talking about the FCC doing away with the CW portion of the amateur exam for general & extra class, never thought they would do it, but it's gone for good now. This is how quickly things change!

One other thing that would look odd to a lot of younger people are the old hamfest flyers, well not that old, just from the 1980's. There are NO cell phone numbers or e-mail addresses. How did we ever survive without these modern marvels??

<u>Page 3.</u>

I have always enjoyed history myself. Even in the old club records you can see the signs of the times & how we and the country have changed and are changing still. Not always for the better either!

Well we are into November, and there is one good thing about November other than Thanks Giving, and that is the end of hurricane season! Always happy to see it go! We won't be meeting at the GCECG again until January.

Joe Wileman, AA5OP is the new Galveston County Liaison officer for RACES. If you would like to become a member of RACES see Joe for an application. He can tell you what you need to do to become a member.

Bill Steele, WA5WVP & Joe Wileman, AA5OP have made some improvements to the Tidelands communications trailer over the past few days. I think it's going to be great! I won't go into detail about the improvements, I would like for them to be able to fill everyone in on that at the meeting. It will be different though.

The VE team will hold an amateur exam on Saturday November 20 at 9:00AM. If you know of anyone wanting their Technician license or an upgrade send them to the TARS site or give them my information, it's near the top of the page.

I have one item that came from the club history box below. Some of you may even remember them. Except for the color of the logo it's still pretty much the same as now. Some of these were among the things in the box.

<u>Page 4.</u>

I also have an old newspaper article from the 1980's Texas City Sun. It was about field day & Tidelands. I wish we could get an article like that now during FD or any event. That would be great for the club!

I think this just about wraps it up for me this issue. If any of you has an article that relates to amateur radio or not amateur radio, let me know & I may include it in one of the issues of hamtides. So long as it's Not Politics. If you have anything for sale or trade please let me know, and it can be added as well.

Everyone try to make it to the November 11 meeting for officer nominations & the guest speaker from TCPD.

73, till next time!
